

# CYCLOPS

## TRANSFORMER SLING

**The Cyclops:  
A Safer and More Versatile Lifting Sling**

The Cyclops is a unique double adjustable transformer sling that features a fixed eye in the middle of the two adjustable eyes. This design provides a safer lifting solution by keeping the load secure even if one side of the sling becomes unsecure.

The Cyclops is made from a polyurethane-coated 12-strand, 2-ends per carrier polyester braid, which is both strong and durable. Each sling comes with a serial numbered tag that specifies the lifting capacity at 60°, 45°, and 30° angles. The Cyclops is designed to be used only in a basket configuration.

**Optional Cordura Sleeves**

The Cyclops can be optionally equipped with Cordura sleeves in the eyes. This provides added protection for the sling and helps to prevent wear and tear.

**The Cyclops:  
A Smarter Lifting Solution**

The Cyclops is a smarter lifting solution that provides peace of mind and increased safety. It is the perfect choice for a variety of lifting applications, including:

- Construction
- Manufacturing
- Shipping and transportation
- Mining
- Utilities

Diameter	Color	Length	Work Load Limit (WLL) 5:1 FOS in basket configuration		
			90° in basket	60°	45°
1/2"	Yellow	27"	2,600 lbs.	2,080 lbs.	1,450 lbs
