## ROPES

### Double Braid Polyester

Double Braid rope with polyester cover and Polyester core. Available coated and uncoated.

### Extreme Winch Line

Spliced and proof loaded then a Polyester cover is braided over the Plasma for added abrasion protection.

### P/D 3-Strand

Polyester/Polypropylene rope generally used for Hand Lines or general-purpose rope.

### D/T Composite Double Braid

Is a double braided rope with the inner core made of Plasma® and the outer sleeve of polyester.

### Plasma® 12-Strand

Plasma® 12-Strand is the highest strength synthetic rope available in the HMPE industry. Plasma provides an excellent combination of high strength, low stretch, excellent weathering and easy handling.

### Polyester 12 Strand

Has the lowest stretch and highest strength of all polyester constructions.

## RIGGING SOLUTION

### Tie Down

### Hoisting

**Crosby®**
